## 2007 Ohio Vegetable Production Guide is Now Available

The 2007 edition of the Ohio Vegetable Production just came off the presses and will soon be available at your local extension office. If you cant wait, pick up your copy on sale at the OSU Vegetable Team table at next weeks Ohio Fruit and Vegetable Congress. The good news is the price is the same as last year and check out the new spiral binding that insures no lost pages and easier use. Truly more for less. Keep up to date on the latest recommendation and order your copy today.

## 2006 Midwest Vegetable Variety Trial Report for 2006

This publication is also available and contains variety trials from several Midwestern states and the region. Each year, this bulletin contains the latest reports from Dr. Jerald Pataky's work at the Univ. of IL on reactions of sweet corn to common diseases. It also includes reactions to the herbicides Accent and Calisto. A limited supply will be available at the Congress for \$15.00 each.

## Research Reports
