

VegNet Vol. 8, No. 29, September 12, 2001

Possible Frost Friday Night-Saturday Morning  
R. Precheur

Keep tuned to local weather reports this Thursday and Friday. A large high pressure area with cold arctic air will move into the northeast by the end of the week. The potential for scattered frost on Friday night into Saturday morning exists in some parts of northern OH. Dewpoint: Keep watch on the dewpoint temperatures. Temperatures at night usually fall to the dewpoint temperature. If the air is dry enough and dewpoints are below 32 degrees, there is a good chance of frost. Low lying areas may receive frost even though dewpoints are at or above 32 degrees because cold air settles in these areas.

What was that address: /www\vegnet ~hpp/????  
R. Precheur

Can't remember that address for the VegNet homepage or you don't have us bookmarked! Well, there has been an address change to make things simpler. Now all you have to type in the address window of your browser is: vegnet.osu.edu You don't need the http, the www's or the two backslashes. Check it out! By the way, the old address will continue to work, so if you have us bookmarked, you don't have to do anything.

Crop Reports  
Hal Kneen  
SOUTHEAST

Largest stake tomato grower in the county continues to harvest excellent quality fruit. Most other tomato growers have pulled up stakes and getting ready to plant cover crops. No rain the past week or so. Dry to extremely dry in most of the county. Still harvesting sweet corn but in limited amounts for the local farmers' market. Green peppers are still being picked. Pumpkins are turning orange, very little foliage left due to diseases and ideal environment for diseases. Most mornings we are having fog until 10 a.m.

What's New At The VegNet Web Site

Online Edition of the 2001 Ohio Vegetable Production Guide - Now Available  
Sweet Corn Disease Resistance Ratings

The following are summarized lists of Dr. Pataky's work at the Univ. of IL on disease reactions of sweet corn. In these summaries, all experimental and processing

varieties have been removed and only named varieties which were rated for common rust or MDM are included. The first list are those named varieties rated for common rust. The second list are only those named varieties rated for Maize Dwarf Mosaic virus (MDM). For a complete report, E-mail: Bob Precheur:
