Methods:

Seeds were planted May 18th at the OSU South Centers research and demonstration plots. Four rows of each cultivar were planted on 30 inch rows.

Results:

7 varieties were tested including Autumn Explosion, RBV 1002 UR, RBV 8000, RBV 3004, RBV1002SL, Redi Maize and RBV 1009N. 6 varieties were planted as observation trials only by seed company request including RBV 1402BL, RBV 5000, RBV 1009SL, RBV 1302R, RBV 4000 and RBV 7000. There was no statistical difference among marketable ears per acre, average ear length nor average ear width.
